

A unique opportunity to look at your business in a new light.  
Find out where you can make savings in Your Supply Chain, and  
how your Supply Chain measures up to Lean Principles.

## Lean Supply Chain Thinking Workshop Thursday, 4th December '08

Dear @FIRSTNAME@

### Introduction:

Much has been done to achieve high standards of Lean Manufacturing - this is well documented and dates back to Toyota in 1970's. Not so much, however, has been developed to achieve similar standards in the end to end Supply Chain - where Lean Principles are equally relevant.

At this unique training opportunity in the beautiful setting of the Hook Norton Brewery in North Oxfordshire ([www.hooknortonbrewery.co.uk](http://www.hooknortonbrewery.co.uk)), you will have the chance to listen, learn and to contribute to new ways of developing your Supply Chain. Find out how to look for those hidden COST SAVING opportunities.

The Lean Principles will be taken forward to show you how they can support low Carbon strategies, and further to achieve sustainability in your Supply Chain. It is our policy to present commercial "green" strategies, you will see examples of cost reduction and carbon reduction.

### Why attend:

This training workshop has been created to build on the theory of Lean Supply Chain Thinking and explore some of the real issues of implementing real and sustainable commercial benefits; It is aimed at all levels, including:

- Those with basic understanding of the principles of Lean Thinking who now wish to apply these in their own supply chain organisation
- Managers with current responsibility for supply chain improvement who require a framework within which to embed their change programme
- Those who wish specifically to ensure that their ongoing improvement programme is set in the proper context of carbon footprint reduction and sustainability

### What you will learn on the Training Workshop:

- Recap on the principles of lean thinking and what this means to an integrated Supply Chain
- An outline framework of Structured Thinking and Analysis
- Defining and measuring value - how to stay focussed on customer requirements

## WORKSHOP DETAILS

### WHERE:

## Hook Norton Brewery

Brewery Lane  
Hook Norton  
OXON  
OX15 5NY

directions.

### WHEN:

Thursday, 4th  
December

- Flow and demand pull - overcoming the barriers to a pull based supply chain
- Is Lean Thinking compatible with carbon management and sustainability?
- A practical group exercise to re-engineer a supply chain towards a lean goal
- How these principles apply to your Supply Chain.

09.30 - 3.30

The training workshop will consist of a mixture of lectures, real case examples and practical group exercises. Places are limited due to the nature of the training, we have chosen to run it as small groups to give participants maximum value, and our personal attention throughout.

**Venue:**

Hook Norton Brewery is a living and working museum, rooted in an age when most towns and large villages could boast their own brewery. Sadly, this is no longer the case, but Hook Norton is one of the only few surviving independent family run breweries. The building itself is probably the finest example of a Victorian tower brewery and is still powered by a 25-horse power Steam Engine.

All delegates will have the opportunity for a tour of the Hook Norton Brewery. This optional tour will take place after the workshop at 3.30 pm and takes approximately 1 hour.

**Accommodation:**

We can advise on local accommodation, please email [marketing@clickonlogistics.com](mailto:marketing@clickonlogistics.com) for details.

**How to Enrol:**

Visit [www.leansupplychain.co.uk](http://www.leansupplychain.co.uk) for further details and to book your place.

Alternatively you can call the team at Click-On Logistics on 01295 817654 or email [marketing@clickonlogistics.com](mailto:marketing@clickonlogistics.com) for more information.

We look forward to welcoming you to our workshop.
