

## PRESS RELEASE 11<sup>th</sup> December 2008

### Lean Supply Chain Workshop

Click-On Logistics Ltd, hosted a one day workshop on Thursday, 4<sup>th</sup> December on Lean Principles applied to the Supply Chain at the Hook Norton Brewery, Oxfordshire (the only brewery still driven by steam - a good demonstration of sustainability). The forum was well attended and covered important topics including structured thinking, analysis techniques and data cleansing to ensure a robust project process. Several live examples of recent work undertaken by Click-On Logistics Ltd were used to fuel the lively debate during the day.

Delegates were treated to a tour around the the historic brewery, and everyone took the opportunity to sample the products. Click-On Logistics demonstrated how Lean Principles can be applied to support low Carbon strategies, whilst achieving cost savings at the same time effectively “Buy One Get One Free” to use the retail analogy

Kevin Zwolinski, Founder and Managing Director of Click-On Logistics Ltd comments: “We were delighted to share our Lean project experiences with existing and prospective clients in a beautiful setting. The level of interest in our approach to Lean Supply Chain is most encouraging, and has proven to be absolutely consistent with client needs in these difficult times. We will be running more sessions again in the New Year.

The Company representatives on the Workshop ranged from Utility Companies, Consumer Goods Companies and Electronic Companies. This is what they had to say:

*“I found the Workshop useful and thought provoking” EDF Energy.*

*“Interesting topics, the sessions were illuminating” Twinings*

*“Extremely enjoyable format” Ingram Micro*

*“Very interesting, we need to do more” BTOpenreach*

The End.

About Us Click-On Logistics Ltd., is an established and innovative management consultancy, who focus on logistics and supply chain management. We work with a wide range of clients in the UK and on mainland Europe, in providing business solutions to meet client needs. Our Carbon Management methodology has been carefully developed to help companies with their corporate and social responsibility programmes in a pragmatic way that engages logistics operations and helps them to implement change.
